

iAuthenticate™

The iAuthenticate™ FIPS 201 approved smart card reader is designed to work with Apple® iPhone®, iPad® and Mac®.

The iAuthenticate™ reader supports standard ISO 7816 smart cards issued by the US Government (PIV and CAC). It can also be used with desktop computers through a microUSB connector (cable & software not included).

The iAuthenticate™ reader includes a license to Thursby's PKard® app for FIPS 140-2 secure access to web-based email, portals and collaboration sites authenticated to CAC, PIV or other approved smart cards.
