

ACR38U-TFC Ultra Portable PC-Linked Smart Card Reader

ACR38U-TFC combines smart card reader functionality with mobility to enable you to access highly secure applications anytime and anywhere.

A new member to the ACR38 line of PC-linked Contact Smart Card Readers, ACR38U-TFC is a reliable smart card reader that supports ISO 7816 smart cards and various memory cards, as well as microprocessor cards with T=0 and T=1 protocols. It is fully compliant with PC/SC and CCID specifications, and supports various operating systems such as Windows, Linux and MAC.

Built with a trendy design, ACR38U-TFC is a portable and lightweight smart card reader that is particularly suitable for frequent travelers who wish to securely login via the intranet and access important files while on the go.
