

IMAP Instructions for HTC Droid Incredible

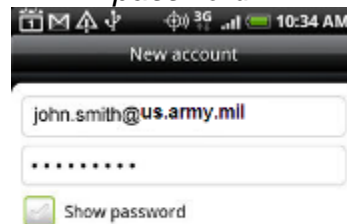

1. From the home screen, touch the applications tab (located in the lower-left).

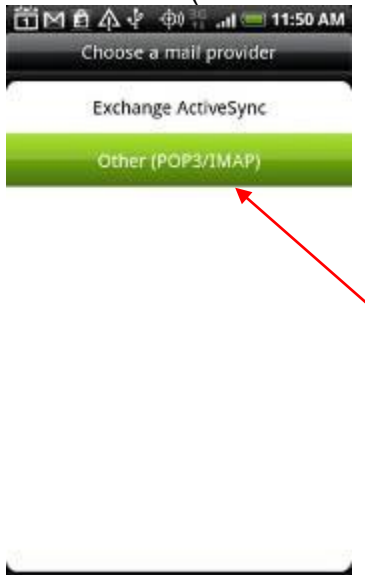

2. Touch Mail.

4. Enter your *IMAP* email address and password.

3. Touch Other (POP3/IMAP).

Touch one of the following *options*:

Manual setup

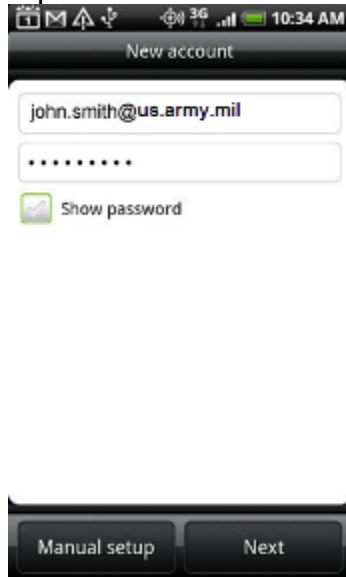

Enter the IMAP settings manually

Next

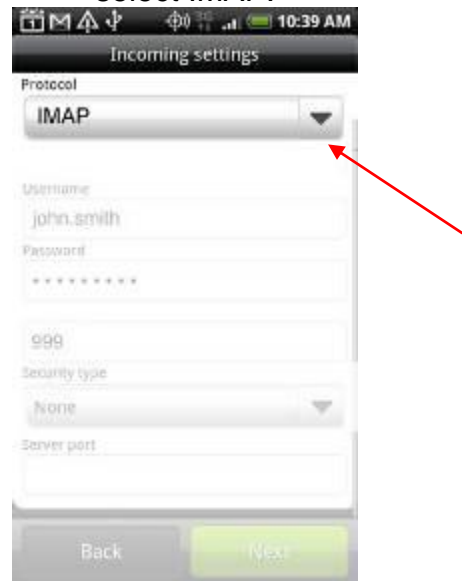

Attempts to automatically enter the IMAP settings

❖ If *Manual setup* was selected or if the automatic setup fails, continue to step 5.

❖ If *Next* was selected and successful, skip to step 13.

5. Touch the Protocol dropdown then select IMAP.

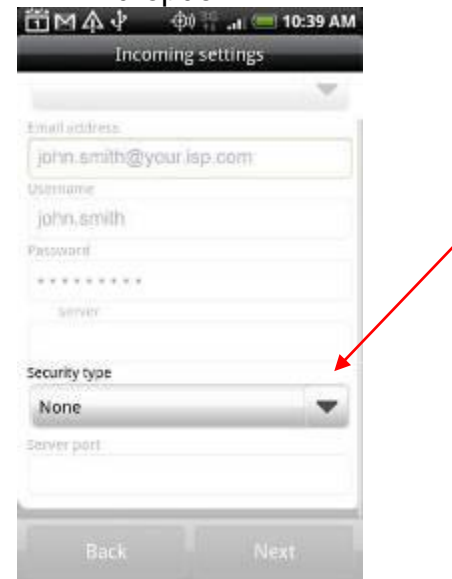

6. Enter the *incoming IMAP server settings*.

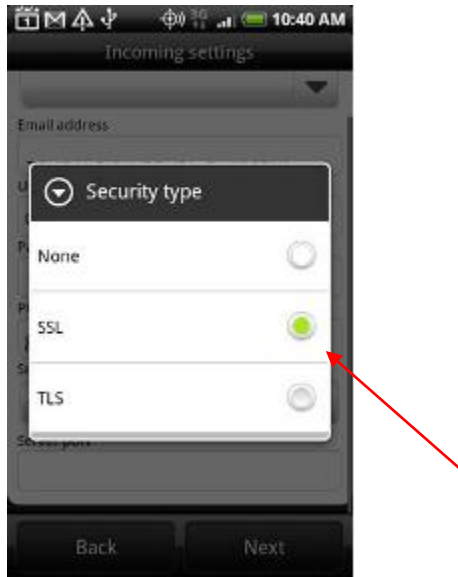

- Email address
- Username
- Password
- IMAP server: imap.us.army.mil
- Server port: 993

7. Touch the Security type dropdown.

8. Touch the *security type*. Select SSL. (Note: If there are multiple SSL options, choose 'accepts all certificates')

9. Touch Next. (Note: you may be prompted that "there are problems with the security certificate for this site". Ignore this warning and click "Continue")

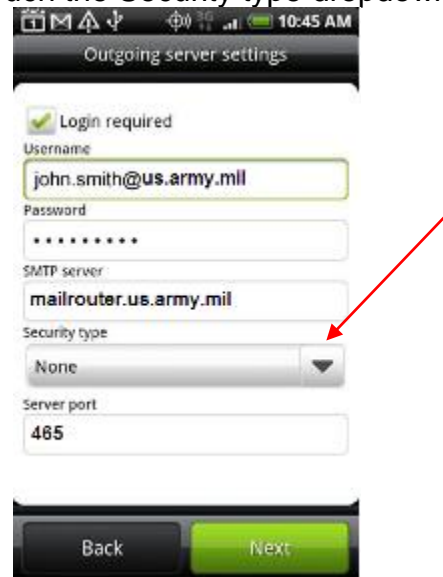

10. Enter the *Outgoing IMAP* settings.

- Username
- Password
- SMTP server: mailrouter.us.army.mil
- Server Port: 465

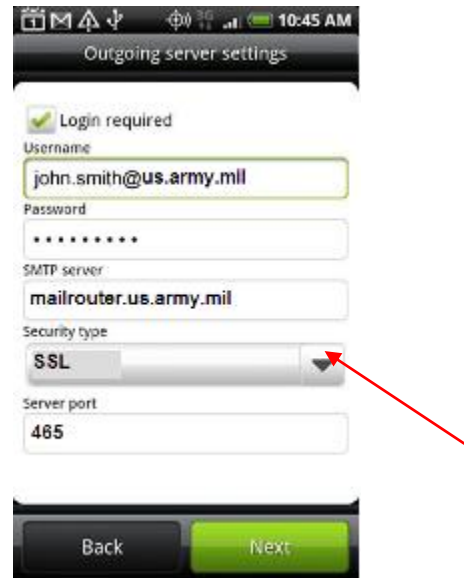

11. Touch the Security type dropdown.

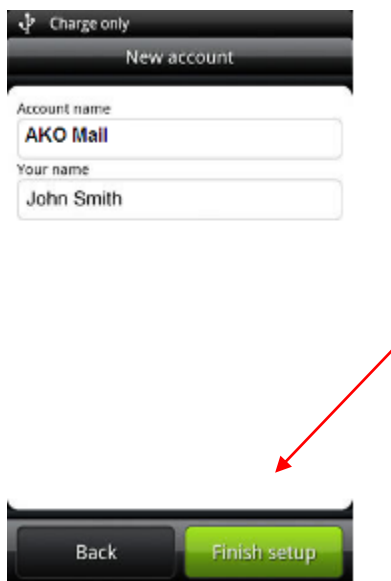

12. Touch the *security type*. Select SSL. (Note: If there are multiple SSL options, choose 'accepts all certificates')

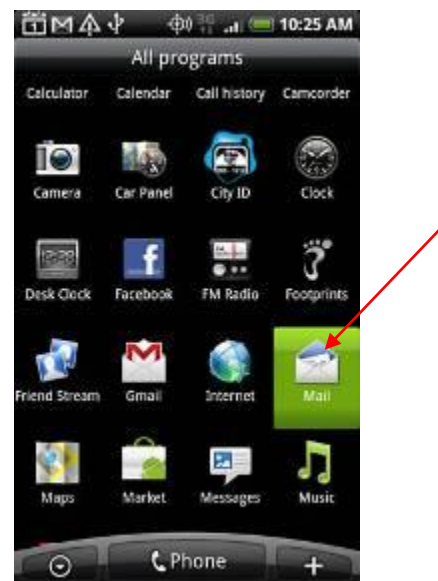

13. Touch Next. (Note: you may be prompted that "there are problems with the security certificate for this site". Ignore this warning and click "Continue")

14. Enter an *account name* and the *outgoing message name* then touch Finish Setup.

15. Upon completing the mail setup, the Mail app will automatically open. (If not, you can always go back to the Applications tab and open the Mail app)

16. Upon opening the Mail app, you may be prompted that “there are problems with the security certificate for this site”. Again, ignore this warning and click “Continue.”

Keep the Mail app open for about a minute until your inbox populates with your current emails. If this does not occur, try closing the Mail app and repeating this step.
