TACTIVO ™
BY PRECISE BIOMETRICS

Smart Card Reader for iPhone 6

Tactivo is a form-fitted mobile smart card reader that provides convenient and secure access to restricted resources on mobile devices.

Convenient Mobility

Tactivo brings true mobility to organizations using smart cards and solutions can be deployed in the existing PKI (Public Key Infrastructure). Our smart card readers are proven and used by the US government, UK and Swedish healthcare and Fortune 500 companies.

Secure and compliant

Tactivo for iPhone 6 offers strong security through two-factor authentication, combining smart card authentication with PIN-code. All our smart card readers are FIPS 201 compliant, listed on GSA APL and made in the USA. Supports U.S. smart card credentials including PIV, PIV-I, CAC, and TWIC.
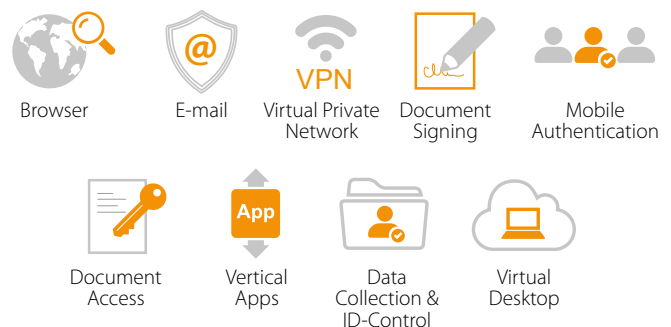

User experience

Tactivo for iPhone and iPad are form-fitted and designed to perfectly fit and protect the device in order to keep the user experience. The smart card is easily inserted and removed on the back of the smart card reader.

Precise iOS Toolkit

The Precise iOS Toolkit allows developers to implement self-contained authentication or integrate with third-party identity managers and service providers. This enables Tactivo to be used with any app.

Wide range of use cases

Tactivo can be used with a wide range of applications that enables many different use cases within healthcare, government and enterprises. Our strong partner network, which includes some of the leading mobility vendors, offers solutions that easily can be integrated into any smart card infrastructure.

Browser	E-mail	VPN Virtual Private Network	Document Signing	Mobile Authentication

Document Access	Vertical Apps	Data Collection & ID-Control	Virtual Desktop
